(54) Title: FLUID DELIVERY APPARATUS

WO 03/086952 A1

(57) **Abstract:** The invention provides fluid delivery apparatus comprising a mobile storage container (10) having at least two compartments, for use in transporting at least two fluids from main storage tanks to subsidiary storage tanks (17, 18, 19), at other locations, the apparatus having means (23, 24) defining at least two fluid flow paths, for connection to at least two different fluid flow ports (20, 21 and 22), the apparatus including electronic means (25) to identify uniquely the fluid flow paths and the fluid flow ports, to reduce the risk that a fluid flow path will be put into communication with an incompatible fluid flow port.
